

Top 5 Tips for Boosting Member Satisfaction Scores

Thank you for being a valued provider for members in one or more of our health plans: Health Partners Plans Medicaid and CHIP plans, Jefferson Health Plans Medicare Advantage, and/or Jefferson Health Plans Individual and Family Plans.

Jefferson Health Plans/Health Partners Plans members in your practice will receive the CAHPS survey – the Consumer Assessment of Healthcare Providers and Systems survey used to evaluate patient satisfaction. “Getting care quickly” is an important part of the survey, and an overall indicator of your patients’ satisfaction with your practice.

Consider these tips to help patients get care quickly:

1 Rely on your front office: We know your time is limited and you’re busy seeing patients. Rely on your front office staff for help. Having a staff member reach out to patients and establish a connection when there is a longer wait than normal can alleviate stress and anxiety for patients. Reaching out to patients before an appointment and understanding their needs can also help triage patient appointments.

2 Offer other ways to access care: Offer alternate options for your patients to access care during off hours and provide education around urgent care (for fevers or sore throats) versus visiting the ER (severe chest pain, labor or heavy bleeding). Gauge how patients feel over the phone. Patients might not need to come into the office for care after all—leaving more time for the sickest patients.

3 Plan ahead: Schedule their follow-up appointment before they leave the office.

4 Know the standards: Review appointment scheduling protocols and access to care standards for PCPs and specialists. Consider having front office staff educate patients on these standards to help set expectations. Jefferson Health Plans/Health Partners Plans members are encouraged to contact Member Relations when providers do not meet these standards.

Type of Visit	Primary Care	Specialist
Routine Office Visit	10 Days	15 Days
Routine Physical	3 Weeks	N/A
Preventive Care	3 Weeks	N/A
First Newborn Visit	2 Weeks	N/A
In-Office Wait Time	30 Minutes	30 Minutes

5 Utilize appointment reminders: Call, email or text patients 48 hours before their appointment. This help reduce “no shows” and allows providers more time for patients who need more urgent care.
