What is NCQA's AAP Measure?

The percentage of members 20 years of age and older who had an ambulatory or preventive care visit during the measurement year.

This measure reports on the following stratifications:

- 20-44 years old
- 45-64 years old
- 65 years old and older
- Total

Visits may be face-to-face, e-visit or telehealth.

This measure **is only an administrative measure** which means that the only way to get credit for this is to submit the appropriate code on a claim.

Health Partners Plans **may not perform** medical record review for the AAP measure.

Best Practices Documentation

- CMS guidance requires the provider to collect and document the member's medical, surgical and procedure history:
 - Allergies
 - Medications
 - Blood pressure, weight, BMI
 - Illnesses – acute and chronic
 - Hospitalizations
 - Procedures
 - Immunizations
- Assess cognitive function with tools such as Mini-Cog (<https://mini-cog.com>)
- Assess for risk factors such as depression, feeling safe at home, substance use
- Review functional levels such as ADLs, IADLs, hearing, sight, fall risk
- Counseling on wellness such as diet/nutrition, and physical activity/exercise
- Discuss the needs for preventive screenings such as cancer, cholesterol, bone density and diabetes
